ABOUT US

- Fully vertically integrated Strawberry farming with full control across the value chain
- Founded in 2004, Galina has rapidly grown to become a leading Egyptian manufacturer, specialized in the processing and production of IQF fruits and vegetables. The company has quickly gained international trust and reputation for its premium quality
- **Galina** strategically incorporates a fully and vertically integrated Strawberry farming with full control across the value chain
- The Company leverages an export driven business model, whereby it has established a strong global presence and has developed to become a leading supplier to prominent international players across the wider F&B space. **Galina** boasts a large, diversified client's base, which spread mostly across US, Europe, Canada, Asia and Middle East

- Located in Alexandria, Egypt **Galina** uses a modern state-of-the-art processing plant with best-in-class quality assurance measures to deliver agricultural products all-year round to worldwide partners. Production capacity has doubled, following the expansion and renovation of the facility and continuous investment
- **Galina** is a supplier of choice to globally renowned names in the wider F&B industry, including other manufacturers, re-packers, traders and wholesalers
- Since its inception, **Galina** has grown operations to more than 40 markets worldwide.

OUR VISION

Galina aims to expand in the local market. As it is one of the most trusted companies in the field of agriculture & food processing internationally, therefore, consuming a major part of the local market is feasible.

WHY CHOOSE US

- **Galina** takes major steps towards food safety and product assurance. We invest more than 500,000 euro to increase food safety standards and improvement of product standard control.
- **Galina** applies the strictest quality control measures, HACCP systems and Euro G.A.P.
- We continuously upgrade our facilities to implement top technologies in the field, employing the latest market trends.
- With the aid of our 35,000 tons production capacity, we are committed to producing quality products.
- One of the main reasons for the success and prosperity of this company, is the fact that Egypt is blessed with fertile soil.
- The weather all year round is exemplary for the production of a variety of fruits and vegetables.
- We focus on our clients' needs and we give attention to detail.
